

**WHEELCHAIR AND CARRYING WHEEL PROVIDED WITH
A WHEEL MOTOR FOR USE IN SUCH A WHEELCHAIR**

Abstract of the Disclosure

* The invention relates to a wheelchair, containing: a frame, at least two carrying wheels, whereby each carrying wheel by means of an insertable axle is detachably connected to the frame, and at least one electrical wheel motor for electrical drive of the carrying wheels, whereby the wheel motor is fitted at least partly in a wheel hub of a carrying wheel. The invention also relates to a carrying wheel provided with a wheel motor for use in such a wheelchair.
